Due to their significant tax incentives, flow-through shares purchased inside a limited partnership carry a low (or zero) adjusted cost base. This results in a capital gain for unitholders should the general partner sell a flow-through share from inside the partnership. The general partner will, on occasion, decrease or eliminate a holding from inside the partnership in order to lock in gains, manage liquidity constraints, or mitigate the impact of deteriorating fundamentals for a particular investment.

CDR 2007 completed its tax-deferred rollover into Dynamic Managed Portfolios Ltd. on May 22, 2009. Unitholders received 0.4487 shares of DMP Resource Class for every unit of CDR 2007. On the date of transfer, the net asset value per unit for CDR 2007 was \$6.32 and the net asset value per share of DMP Resource Class was \$14.08. CDR 2007 was subsequently dissolved.

The Canada Dominion Resources Group is a leader in flow-through share finance. To date, Canada Dominion has raised nearly \$1.2 billion for investment in energy-related ventures on behalf of investors across Canada. When combined with CMP, the two offerings form the largest flow-through investing platform in Canada, raising more than \$3.6 billion for exploration and development efforts since their inception.
